

SmartField User Guide

SmartField helps researchers collect field phenotyping data with intelligence.

Steps:

1. Install ODK-X apps and load SmartField config to /sdcard/opendatakit/default/config/
2. Launch Survey and choose 'SmartField Maize Trial'
3. Navigate using row/column or barcode
4. Enter numeric, date, text, rust rating, and audio notes
5. Look for reminders on overdue data
6. View plot summary or export your data as CSV
7. Supervisors can use the dashboard to track team performance
