

## SmartField Admin Guide

As an admin, you manage form logic, user training, and deployment.

### Responsibilities:

1. Configure and maintain the formDef.json and tables
2. Customize rust\_rating scale and trait visibility settings
3. Train users using the User Guide or video
4. Maintain backups and updates of the configuration
5. Prepare trait imports/exports using CSV/JSON formats
6. Optionally set up a sync server for real-time data collection
7. Manage supervisor dashboard for live monitoring
